Advanced Graph Algorithms lecture - TUM - Mathematik - M9 An undirected graph is connected if every pair of vertices is connected by a path. A forest is an acyclic graph, and a tree is a connected acyclic graph. A graph that has weights associated with each edge is called a weighted graph. Graphs can be represented by their adjacency matrix or an edge (or vertex) list. Releases · neo4j-contrib/neo4j-graph-algorithms · GitHub Shortest Paths : Dijkstras shortest path algorithm.
